

**YOU ARE
NOT
ALONE**

**EARLIER TREATMENT
LEADS TO BETTER
OUTCOMES**

**Don't wait to find treatment for
your venous leg ulcers**

A recent study showed that patients who received early vein closure treatment along with compression stocking therapy for venous leg ulcers experienced⁷:

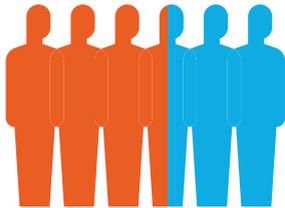

- Significantly shorter time to healing
- Extended time free from ulcers

Ask your doctor about CVI screening.

**CVI and venous leg ulcers are more
common than you think**

More than **190 million people** around the world suffer from CVI.³

More than **1 million people** in the U.S. suffer from venous leg ulcers.^{4,5}

More than half
of venous ulcers
treated are recurrent
ulcerations.⁶

70%–90%
of all ulcers below the knee
are venous (caused by
diseased veins).^{4,5}
